# Scenario: Automate price maintenance with Excel input.

# E1 Pages - news

- Drill down to subpages — recreate menu structures
- Call orchestrations directly from a page
- Rename orchestration input — explanatory user input fields
- Add up to 4 watchlist badges on a page tile — keep track of multiple situations for the same program or subpage

# Form Extensions - news

- Call Logic Extensions directly from a Form Extension
- Allow LEX to manipulate form field behavior

# Orchestrations - news

- Native CSV/Excel input mapping and processing
- Allows drag and drop for files into the Orchestration
- New performance and detailed execution logging capabilities (use together with the enhanced Orchestration Monitor)

# Notifications - news

- Rich text formatting of notifications
- Notification Reminders allows you to whine about unread messages
- Task Tracking enables logging of manual tasks to identify missing actions, bottlenecks etcetera

# Guided learning - quick tour
