JD Edwards Nordic  
Conference

# JD Edwards Nordic Conference

Tuesday, 14 May, 2024  
Hotel Jacy'z, Gothenburg, Sweden

08.00-09.00	<b>Registration</b> – drop-in coffee and bagel Conference Lobby, floor 4
09.00-09.15	<b>Welcome to JD Edwards Nordic Conference 2024</b> We are proud to once again host the JD Edwards Nordic Conference, in cooperation with our partners Oracle, Redfaire International and Cadran Consultancy. The JD Edwards Nordic Conference is set to showcase a wealth of knowledge, the latest news, inspirational content, and ample networking opportunities. Discover new functionalities and explore real-life case studies demonstrating how others have successfully navigated various business challenges. The conference will feature engaging presentations and breakout sessions, insights from renowned speakers, and the chance to connect with other JD Edwards users.  <b>Luis Panozzo</b> Partner Manager – Oracle  <b>Christer Ostenfeldt</b> CEO at xperitus Conference room Freddy Fine
09.15-10.00	<b>Release 24 and Beyond: JD Edwards Product Update and Roadmap</b> Release 24 delivers on JD Edwards' promise of digital ERP. Join Mark Herwege and Bart Vanden Abeele, Senior Solution Engineers, for a review of Release 24 and the innovative solutions that help you optimize your JD Edwards applications. Learn how you can enable those applications to be the core of your digital initiatives, and simplify and automate managing your JD Edwards instances. We will also touch on some of the more interesting innovations we are currently working on as we move toward intelligent ERP.  <b>Bart Vanden Abeele</b> Master Principal Solution Engineer JDE at Oracle  <b>Mark Herwege</b> Master Principal Solution Engineer JDE at Oracle Conference room Freddy Fine
10.00-10.30	<b>Coffee Break</b> , Conference Lobby, floor 4

10.30-11.15	BREAK OUT SESSIONS – BLOCK 1			
Break-out session 1	Break-out session 2	Break-out session 3		Break-out session 4
<p><b>Inventory Locations on Hold: Ensure Inventory Integrity and Compliance with Inventory Location Holds in JD Edwards EnterpriseOne</b> Take command of your inventory management processes by placing specific locations on hold. Whether it's due to quality control issues, regulatory concerns, or internal audits, JD Edwards EnterpriseOne gives you the flexibility to restrict inventory movements and transactions as needed.</p> <p><b>Automated Safety Stock: Boost efficiency and minimize stockouts or excess inventory costs.</b> Say goodbye to overstocking and stockouts. Our automated safety stock feature dynamically adjusts inventory levels based on demand patterns, lead times, and service level targets.</p> <p><b>Advanced Lot Track &amp; Trace: Get control of your lot handed items from origin to destination.</b> Advanced Lot Track &amp; Trace Application. With this cutting-edge feature, you can achieve unparalleled visibility and control over your lot-based inventory, ensuring compliance, mitigating risks, and enhancing customer trust. Don't settle for outdated traceability practices that leave your business exposed to risks. Take the next step towards traceability excellence.</p>  <p><b>Henric Niklasson</b> Application Specialist at xperitus</p>	<p><b>Pricing: Different ways to make your maintenance of large numbers of pricing data easier and quicker, both in Base Price and Advanced Pricing.</b> Discover the power of Mass Maintenance in Advanced Pricing and the new enhancement to enable mass import of base price data or use an orchestration to mass import prices and adjustment.</p>  <p><b>Helena Nilsson</b> Project Manager at xperitus</p>	<p><b>The Future is Now: Exploring the latest Tools innovations in JDE Release 24</b> Disclaimer: Detailed agenda may change as Oracle releases new cool stuff all the time. Join Anna and Mikael as we dive into the essential features available in JD Edwards Tools in Release 24. Focus will be news in the Orchestrator Studio where we will demonstrate how you can gain insights of your orchestrations performance with the new detailed logging and process graphs, speed-up and simplify your data management with drag and drop CSV/Excel mapping and the enriched communication features through advanced rich text formatting. Stay informed and proactive with upgraded Notifications Reminders and Task tracking and just for the fun of it, we'll explore the innovative Logic Extensions for custom form control. We will also show the new features in E1 Pages with submenus and Watchlist badges. As you can see we have a lot to show you so fasten your seatbelts - you don't want to miss this opportunity to see how these new features introduced in Release 24 can transform how you approach JDE optimization and customizations!</p>   <p><b>Anna Runesson</b> Application Specialist at xperitus</p> <p><b>Mikael Andersson</b> Application Specialist at xperitus</p>		<p><b>Build Your JDE to OCI Business Case</b> Join Christian Fronteras, CTO – Cloud at Redfaire, for an interactive session focused on the business drivers of moving JDE to Cloud. Christian takes you through the business case deck we use when pitching to a general rather than technical audience.</p> <p>We look at:</p> <ul style="list-style-type: none"> <li>· Why your JDE peers are moving to Cloud.</li> <li>· How Cloud helps you achieve your business goals.</li> <li>· The three main types of Cloud Migrations.</li> <li>· What a Migration Project entails – cost, scope, resources.</li> <li>· FAQs</li> </ul> <p>The audience will leave with a generic template deck that they can then customize to make their own.</p>  <p><b>Christian Fronteras</b> CTO – Cloud at Redfaire</p>

14.00-14.45	<b>BREAK OUT SESSIONS – BLOCK 2</b>		
<b>Break-out session 5</b>	<b>Break-out session 6</b>	<b>Break-out session 7</b>	<b>Break-out session 8</b>
<p><b>How to tackle the most common problems in your Account &amp; Inventory Reconciliation process</b> Discover how Account &amp; Inventory Reconciliation for JD Edwards simplifies and automates the reconciliation process, ensuring your accounting and inventory records align seamlessly. Save time, reduce errors, and optimize your financial close with intuitive tools designed to streamline your operations.</p>  <p><b>Nicolle Celie</b> JD Edwards Finance Consultant at Cadran Consultancy</p>	<p><b>Order fulfillment and cross docking: Optimize your fulfillment process of inventory to sales order lines to ensure customer satisfaction</b> When you have limited supply, you need insight into how to prioritize orders. With Oracle's JD Edwards EnterpriseOne Fulfillment Management, you rapidly access all the information needed to assign inventory to customer sales orders. You set objectives or service levels for one customer or groups of customers, by product or product group, as well as by supply location. Depending on how you set your service levels, JD Edwards EnterpriseOne generates fulfillment plans that you manage or modify as necessary. Use Cross-Docking to earmark a purchase order to a sales order, partially or fully, when receiving it.</p>  <p><b>Helena Nilsson</b> Project Manager at xperitus</p>	<p><b>Stay Current – JDE Upgrades from both a technical and planning perspective</b> Make your upgrade planning and execution more effective by utilizing Oracles new tools for impact analysis and get better control over required activities, retrofit costs and allows you to stay code current. And as usual, our favourite flavour is vanilla so see how the new tools can guide you in your get-back-to standard ambitions. Join Michael and Mikael in a session that will allow you to better understand the impact of Application-, 64 bit- and Tools upgrades in order to help you build your upgrade business cases and in the end allow your organization the continuous adaptation of enhancements.</p>  <p><b>Michael Lidman</b> Technical Specialist at xperitus</p>  <p><b>Mikael Andersson</b> Application Specialist at xperitus</p>  <p><b>Christer Ostfeldt</b> CEO at xperitus</p>	<p><b>Did you get My Message?</b> In today's fast-paced digital economy tasks pop up seemingly out of nowhere. Things need to get done, get done fast, and get done right. Easily would be nice, too. Amidst this frantic pace communication is paramount. Your EnterpriseOne system has several features for managing the communication and assignment of tasks, some of which may tie to business transactions, and others may simply be ad-hoc user tasks, which are nonetheless important. Attend this session to learn how you can use notifications, orchestration messages, and workflow to integrate human tasks with automation. Learn how new features like task tracking and notification reminders can not only keep the communication running smoothly, but also help users organize, prioritize, and report on progress.</p>  <p><b>Bart Vanden Abeele</b> Master Principal Solution Engineer JDE at Oracle</p>  <p><b>Mark Herwege</b> Master Principal Solution Engineer JDE at Oracle</p>

16.15-17.00	<p><b>The JD Edwards EnterpriseOne Digital Platform: On the Road to Enterprise Automation Episode 2</b>  Congratulations! You have been using the JD Edwards EnterpriseOne digital platform to make great advancements in how you use your EnterpriseOne system. You have used Orchestrator to automate processes and to integrate with other systems. You have used the extensibility framework to eliminate customizations and to provide a better experience to your users. Now you might be asking, "What's next?" The answer: We are on the road to Enterprise Automation, the natural evolution from process automation. Last year we introduced the vision of Enterprise Automation, and we laid out a product strategy and roadmap to achieve it. In this session we will review that vision and present an update on the latest EnterpriseOne enhancements that drive us closer to that goal.</p>  <p><b>AJ Schifano</b>, Product Manager at Oracle</p> <p>Conference room Freddy Fine</p>		
17.00-17.15	<p><b>Summary – Christer Ostenfeldt</b>, CEO at xperitus</p> <p>Conference room Freddy Fine</p>
